

ENVIRONMENTAL MANAGEMENT THROUGHOUT THE PROJECT LIFECYCLE

- Environmental Impact Assessments
- Environmental Management Systems
- Feasibility Studies
- Socio-Economic Studies
- Environmental Protection Plans
- Groundwater Supply and Waste Water Disposal Exploration
- Public Consultation Support and Aboriginal Affairs
- Historical Resources Assessments

- Approvals and Permit Acquisition
- Expert Advice and Testimony
- Operation License Applications, Amendments and Renewals
- Water Diversion Approvals
- Water Crossing Notifications
- Pre-disturbance Assessment/Conservation and Reclamation Plans (PDA/C&R Plans)
- Air Quality Assessments
- Carbon Management

- Decommission Plans and Implementation
- Surface Reclamation and Revegetation
- Reclamation Certificate Applications
- Aquatic Habitat Restoration and Enhancement
- Vegetation Management
- Erosion Control and Design
- Post-Construction Reclamation Monitoring

- Remediation System Design, Engineering and Implementation
- Groundwater Recovery Systems
- Water Treatment Systems
- Multi-Phase Extraction Systems
- Soil Vapour Extraction Systems
- Biocell Design/Construction
- Site Management

- Construction Supervision
- Groundwater, Surfacewater and Aquatics
- Soils and Wetlands
- Erosion and Sediment Control
- Wildlife Mitigation and Monitoring
- Watershed Management
- Water Supply and Dewatering Systems
- Environment, Health and Safety Audits
- Regulatory Reporting

- Phase I and Phase II Site Assessments
- Agriculture Surveys
- Spill Response
- Risk Management
- Terrestrial and Aquatic Studies
- Ecological Analysis
- Soil and Sediment Studies
- Geophysical Assessments
- Environmental and Geological Modeling and Mapping
- Dam and Mine Analysis
- Overburden Characterization and Oil Sands Delineation
